

Since 1955

Since 1955, Dewey's 2-part epoxies and sealants have stood for strength and longevity. Originally designed to serve the difficult needs of oil refineries, our products are now used in a wide variety of applications including, refinery and plant maintenance, plumbing, construction and boat repair.

Our epoxies exhibit excellent adhesion to most substrates including:

- Metal
- Concrete
- Fiberglass
- Copper
- Brass
- Aluminum
- Wood
- Glass
- Plastics

PATCH-ALL – Industrial Strength Epoxy

Considered by many as the most durable 2-part industrial epoxy on the market.

- Ideal for repairing pipes, tanks & troughs
- Can be used for vertical and upside-down repairs
- Resistant to oil, diesel, solvents and water
- Can be sanded, painted, or dyed various colors

EPO-FLEX TX– Flexible Epoxy

Available in thick paste (TX) and as a pourable (RP). Use when a flexible epoxy is needed.

- Sets strong and flexible
- Can be used for vertical and upside-down repairs
- Ideal for cracks & seams in concrete and asphalt
- Electricians use this product for encapsulating large components

SUPERCOTE – Tough & Resistant Coating

Repair with PATCH-ALL, sand, then seal with SUPERCOTE for a complete repair.

- Ideal as floor coating, with optional additives for slip-resistance
- Great for sealing concrete, metal and wood
- Can be tinted to match any surface color
